

AA04

NOTICE

- · This product is not intended for life or safety applications.
- Do not install this product in hazardous or classified locations.
- Read and understand the instructions before installing this product.
- Turn off all power supplying equipment before working on it.
- The installer is responsible for conformance to all applicable codes.

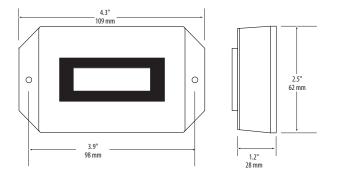

PRODUCT IDENTIFICATION

AA04 Remote display for use with 4-20 mA output devices

OPERATION

The AAO4 remote display converts a standard 4-20 mA output from an environmental sensor into a convenient digital readout.

DIMENSIONS

AA04

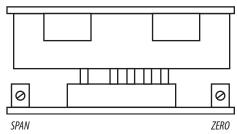

Remote Display, 4-20mA

Installer's Specifications

Repeatability	±2% full scale
Analog Output	4-20mA, scaled 0-100%; polarity sensitive
Input power	Loop powered, 12-30 VDC, 30mA max.

INSTALLATION

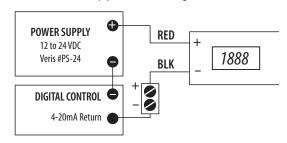

- 1. Mount indoors using the screws provided.
- 2. Wire the device. See the Wiring section for diagrams. Observe polarity.
- Remove the housing cover to expose adjustment pots for calibration. Orient pots as indicated.

- 4. Connect a 4-20mA loop calibrator to the black and red wires.
- 5. Set the loop calibrator to 4mA and adjust the "ZERO" pot until the display shows an output of 0%.
- 6. Set the loop calibrator to 20mA and adjust the "SPAN" pot until the display shows an output of 100% (scaling to less than 100% is also permitted).
- 7. Repeat steps 5 and 6 until the scaling is stable at 0 and 100%.
- 8. Replace housing cover.

WIRING

2-Wire, Loop powered, Sinking Transmitter

3-Wire, Sourcing Transmitter
